WORK HISTORY

MAR 2021 - NOV 2021

Quarantine Reservation System - Seoul, South Korea

- Creating an online reservation booking system for a government mandated quarantine facility in South Korea.
- Used different REST APIs and managed user traffic and implemented sales through the website for the ultimate user experience.
- Successfully managing a high volume of customer's needs and designing the website to be easily accessible and understandable to foreigners entering into the country and needing to mandatorily quarantine.
- Managing Full Stack solutions for bringing in and converting cumsters for long-term stay.

MAR 2020 - FEB 2021

Mobile App Developer - Remote

- Developing a Cross-Platform App using Flutter to interact with the web and use APIs to provide an Instagram-like experience to the user.
- Managing MongoDB databases through Node.JS server coding to manage user-state and data through-put in a load-bearing system.

MAR 2014 - JUL 2017

Dillon's #68 & #98 - Lawrence, KS

- While going through College, I worked with customer service, maintaining products and quality assurance.
- Working with corporate instructions to execute the desired work and achieve objective goals.

APR 2013 - SEP 2013

Server Systems and Hardware Manufacturing - Lawrence, KS

- Manufacturing large-scale server systems to big customers across the United States.
- Proper assembly of all the parts in a system for servers.
- Clients would often be schools or libraries or government offices that needed use of large and custom server-systems.
